2014-02-17 Michael G. Plansky 5 essays on efforts to promote and develop disc golf as a unique lifestyle sport. The Disc golf phenomenon has been evolving for nearly 40 yrs now, and it's time that the rag-tag legions of recognized disc golf enthusiasts take the reins. A roots movement of activists sharing experience and vision will develop the branch structure necessary to weather the influence of mainstream media when they discover that disc golf may mean dollar signs. From Carson City Nevada to the IRS to the Cal Poly Pomona Space Activators! to Sci-Fi fantasies to Guardians of The Trees, these essays span the 5 years I went back to school for landscape architecture. The capstone of my interest in disc golf as regenerative recreation was my thesis: Disc Golf Course Design: Inscribing Lifestyle. These academic writings trace the activism of one disc golfer's pursuit of better design. What do you see in disc golf's future? The olive grove of Academos awaits! Fling away.

2021-07-28 Joshua Woods This volume examines the rise of an emerging sport as a grassroots effort (or "new social movement"), arguing that the growth of non-normative sports movements occurs through two social processes: one driven primarily by product development, commercialization, and consumption, and another that relies upon public resources and grassroots efforts. Through the lens of disc golf, informed by the author's experience both playing and researching the sport, Joshua Woods here explores how non-normative sports development depends on the consistency of insider culture and ideology, as well as on how the movement navigates a broad field of market competition, government regulation, community characteristics, public opinion, traditional media, social media and technological change. Throughout, the author probes why some sports grow faster than others, examining cultural tendencies toward sport, individual choices to participate, and the various institutional forces at play.

2020 Scott Stokely "Before he was a national disc golf champion, Scott Stokely was a latch-key kid, a troubled teen, an arrogant punk. Before his entry in the Guinness Book of World Records, he was a black-market dealer, an addict, a fugitive from justice. Scott would become a devoted teacher, a dedicated advocate, a team leader, and one of the

toughest competitors in the history of disc golf. But first, he would have to grow up. The story begins in 1976, when a 7-year-old Scott discovers the world's only disc golf course, Oak Grove Park in Pasadena, California. There he quickly falls in love with the sport and becomes a junior member of the world's first disc golf club, the Oak Grove Gophers. Soon he begins to compete. Over the next 25 turbulent years, the one constant in Scott's life will be disc golf, as his career develops from child prodigy into a decade-long successful professional disc golf tour. During those years the sport of disc golf will itself come of age, growing from obscure infancy through adolescent growth pains to respectable adulthood. See this history through the eyes of a man who lived it, beginning with the early "Wild West" highlights all the way through its establishment as a professional sport. Scott's story covers decades of stars, legends, and misfits of the Frisbee family, hundreds of tournaments, and tens of thousands of miles as he tells about his highs and lows, successes and failures, and every aspect of life on the disc golf tour"-- Amazon.com.

2015-01-08 Michael G. Plansky Disc golf emerged as a lifestyle sport from the countercultural movement of the 60s & its popularity has grown while other postmodern recreation forms have faded or plateaued (Wheaton 2004). As an accessible malleable form of recreation its appeal can be explained by a genius loci elicited from direct engagement & a culture of play. What landscape & cultural characteristics of disc golf make it attractive? Participants in the LA region were given semi-structured interviews at 4 popular courses representing 4 distinct typologies to discover preferences. Demographic results and analysis of interviews revealed an overall reluctance to travel, but a desire for variety. Interviewees also expressed overall enthusiasm for courses developed on underutilized post-industrial sites. Camaraderie at each site was shown to be uniquely shaped by rule-creation through play forms (Callois1961); leveling the field for new players, or creating complexity/challenge for experienced players. Guidelines & recommendations are given.
