1924 Public Service Corporation of New Jersey	government services, such as health, education, welfare, waste disposal, and infrastructure. It draws lessons from performance measurement systems in a range of industrial countries to identify good practice around the world in improving public sector governance, combating corruption and making services work for poor people.	how we might better live up to those ideals and values. The revised fourth edition includes a new chapter that examines how the role and significance of these New Public Service values have expanded in practice and research over the past 15 years. Although the debate about governance will surely continue for many years, this compact, clearly written volume both provides an important framework for a public service based on citizen discourse and the public interest and demonstrates how these values have been put into practice. It is essential reading for students and serious practitioners in public administration and public policy.

2018-03-05 Marc Holzer This volume includes perspectives on public service selected from six decades of major public administration journals. Recurring themes include: motivations to enter the public service, positive and negative images of public servants and of government, conflicts between loyalty to the organization and loyalty to the public, morale, burnout, and turnover. The volume also includes cross-national analyses of the public service in other systems, proposals for rethinking public service systems, and questions as to the future of the public service. It recaptures a long, continuing debate as to the health of the public service, and in so doing suggests agendas for university research and administrative action.	1912 New Jersey. 	2015-03-12 Janet V. Denhardt The New Public Service: Serving, not Steering provides a framework for the many voices calling for the reaffirmation of democratic values, citizenship, and service in the public interest. It is organized around a set of seven core principles: (1) serve citizens, not customers; (2) seek the public interest; (3) value citizenship and public service above entrepreneurship; (4) think strategically, act democratically; (5) recognize that accountability isn't simple; (6) serve, rather than steer; and (7) value people, not just productivity. The New Public Service asks us to think carefully and critically about what public service is, why it is important, and what values ought to guide what we do and how we do it. It celebrates what is distinctive, important, and meaningful about public service and considers	1910

Osborne Innovation is a core issue for public services and is a key element of public services reform - particularly in this age of austerity where policymakers urge the need to 'innovate to do more with less'. This comprehensive and accessible Handbook explores the potential for creating efficient and effective public services. Leading researchers from across the globe review the state of the art in research on innovation in public services, providing an overview of key issues from a multi-disciplinary perspective. Topics explored include: context for innovation in public services and public service reform; managerial change challenges; ICT and e-government; and collaboration and networks.

The theory is underpinned by seven wide-ranging case studies of innovation in practice. Taking the field forward and providing a baseline for future research, this highly unique and original Handbook will prove essential reading for academics, researchers, students, policymakers and practitioners across the fields of innovation, public policy, social policy and public management.

1989-04-06 Leonard Ruchelman While citizens usually want more from government, they generally are included to pay less in taxes. When resources become scarce, as has been the case for most public jurisdictions, innovative methods must be developed for

responding to service and cost pressures. How can this be done? A Workbook in Redesigning Public Services stresses a hands-on, how-to approach to diagnosing service delivery problems, analyzing alternative ways of delivering services, and communicating solutions to the policy makers. Among the service options considered are contracting with a private firm, inter-governmental agreements, self-help, franchises, grants and subsidies, and vouchers.

2015-07-08 Richard C. Box Public service values are too rarely discussed in public administration courses and scholarship, despite recent research demonstrating the importance of these values in the daily decision making processes of public service professionals. A discussion of these very tenets and their relevance to core public functions, as well as

which areas might elicit value conflicts for public professionals, is central to any comprehensive understanding of budget and finance, human resource management, and strategic planning in the public sector. Public Service Values is written specifically for graduate and undergraduate courses in public administration, wherever a discussion of public service ideals might enrich the learning experience and offer students a better understanding of daily practice. Exploring the meaning and application of specific values, such as Neutrality, Efficiency, Accountability, Public Service, and Public Interest, provides students and future professionals with a 'workplace toolkit' for the ethical delivery of public services. Well-grounded in scholarly literature and with a relentless focus on the public service professional, Public Service Values highlights the importance of values in professional life and encourages a more self-aware and reflective public practice. Case studies to stimulate reflection are interwoven throughout the book and application to practice is cemented in a final section devoted to value themes in professional life as well as a chapter dedicated to holding oneself accountable. The result is a book that challenges us to embrace the necessity of public service values in our public affairs curricula and that asks the important questions current public service professionals should make a habit of routinely applying in their daily decision making.
