1997 Monica Wellington Baby is surrounded by enticing grocery items.

1999 Valerie Weber Recalls what it was like to help out in the family grocery store and to go shopping in Milwaukee, Wisconsin, during the 1940s.

2012-09-28 Dara O'Rourke Where public policy fails, can consumer choices lead the way to more ethical and sustainable production practices? "Buy local," "buy green," "buy organic," "fair trade"—how effective has the ethical consumption movement been in changing market behavior? Can consumers create fair and sustainable supply chains by shopping selectively? Dara O'Rourke, the activist-scholar who first broke the news about Nike's sweatshops in the 1990s, considers the promise of ethical consumption—the idea that individuals, voting with their wallets, can promote better labor conditions and environmental outcomes globally. Governments have proven unable to hold companies responsible for labor and environmental practices. Consumers who say they want to support ethical companies often lack the knowledge and resources to do so consistently. But with the right tools, they may be able to succeed where governments have failed. Responding to O'Rourke's argument, eight experts—Juliet Schor, Richard Locke, Scott Nova, Lisa Ann Richey, Margaret Levi, Andrew Szasz, Scott Hartley, and Aret van Herdeem—consider the connections between personal concerns and consumer activism, challenge the value of entrusting regulation to consumer efforts, and draw attention to difficulties posed by global supply chains.

2018-10-24 Sharon Zukin This accessible, smart, and expansive book on shopping's impact on American life is in part historical, stretching back to the mid-19th century, yet also has a contemporary focus, with material on recent trends in shopping from the internet to Zagat's guides. Drawing inspiration from both Pierre Bourdieu's work and Walter Benjamin's seminal essay on the shopping arcades of 19th-

century Paris, Zukin explores the forces that have made shopping so central to our lives: the rise of consumer culture, the never-ending quest for better value, and shopping's ability to help us improve our social status and attain new social identities.

2019 Sally Derby Miller Sunday nights are special for Evie and Grandma. That's when they go on their weekly shopping spree. Grandma flips open the newspaper to see what's advertised, and the imaginary tour of neighborhood stores begins. Toting a wallet filled with colorful pretend bills, Evie and Grandma take turns "buying" whatever catches their fancy. A big chunk of ham, a "sofa with a secret," and a dress with spangles are just a few of the treasures they "purchase." Most special of all is the jewelry box Evie chooses for the gold heart necklace Mama gave her before leaving to serve in the army--and the bouquet of flowers Evie leaves as a surprise for Grandma. Overflowing with whimsy and a sweet grandmother-granddaughter relationship, this picture book is a joyous celebration of imagination, family love, and making a lot out of what you've got.

2021-05-25 J.B. MacKinnon Consuming less is our best strategy for saving the planet—but can we do it? In this thoughtful and surprisingly optimistic book, journalist J. B. MacKinnon investigates how we may achieve a world without shopping. We can't stop shopping. And yet we must. This is the consumer dilemma. The economy says we must always consume more: even the slightest drop in spending leads to widespread unemployment, bankruptcy, and home foreclosure. The planet says we consume too much: in America, we burn the earth's resources at a rate five times faster than it can regenerate. And despite efforts to "green" our consumption—by recycling, increasing energy efficiency, or using solar power—we have yet to see a decline in global carbon emissions. Addressing this paradox head-on, acclaimed journalist J. B. MacKinnon asks, What would really happen if we simply stopped shopping? Is there a way to reduce our consumption to earth-saving levels without triggering economic collapse? At first this question took him around the world, seeking answers from America's big-box stores to the hunter-gatherer cultures of Namibia to communities in Ecuador that consume at an exactly sustainable rate. Then the thought experiment came shockingly true: the coronavirus brought shopping to a halt, and MacKinnon's ideas were tested in real time. Drawing from experts in fields ranging from climate change to economics, MacKinnon investigates how living with less would change our planet, our society, and ourselves. Along the way, he reveals just how much we stand to gain: An investment in our physical and emotional wellness. The pleasure of caring for our possessions. Closer relationships with our natural world and one another. Imaginative and inspiring, *The Day the World Stops Shopping* will embolden you to envision another way.

1992-10-01 Alexandra Day When Carl is told to mind the baby at a department store, the faithful Rottweiler and his little friend do some mischievous exploring.

2003 Laura Byrne Paquet Tracing the cultural evolution of shopping from outdoor bazaars to suburban malls, this brazen look at the history and psychology of one of humankind's oldest pursuits considers the variety of reasons (and excuses) that drive the impulse to buy. An opulent collection of shopping places are described, including ancient markets, covered arcades of 18th-century France, gallerias of 19th-century Italy, and megamalls of 1950s America. Examples from literature and other sources explore the historically conflicted attitudes about shopping, it seems that fashionistas have always

fought over the trendiest hemlines and hats. The development of buying options is detailed, from mail order catalogs and Internet stores to retail districts and massive supermarkets.

2010-06-02 Rosten Woo Downtown Brooklyn's Fulton Mall is one of the most bustling public spaces in New York City. A colossus of commerce, it welcomes over one hundred thousand shoppers daily and ranks among the most profitable commercial real estate in the entire country, and is also home to some of the city's most recognized institutions, including cheesecake mecca Junior's, that have been immortalized in song, film, and culture. Despite its historic link to Brooklyn's past and its financial success as a shopping district, Fulton Street is rarely celebrated in New York. The street's hand-painted signs, customized jewelry, rare sneakers, mega-church, and vendors

offer a special sampling of noncorporate commerce, but many consider its sensorial and physical density a sign of blight. Misunderstandings about race, class, and profitability have led Fulton Street to be characterized as run-down, dangerous, or underutilized, and as a result it has been subject to nearly continuous renovation. Recently rezoned and becoming increasingly attractive to national chain stores, Fulton Street is once again poised for big changes. Street Value is a challenge to creatively rethink the planning and urban design of Fulton Street and other urban shopping districts. Street Value explores the mall's historical and contemporary conditions through original essays, oral histories, new and archival photographs, historic documents, and interviews with key planners, developers, city officials, historians, and activists from the 1960s to the present. Street Value probes the ideology of redevelopment and demonstrates how commercial, governmental, and activist forces have coalesced to produce one of Brooklyn's most legendary public spaces.
