With astonishing honesty, this memoir reveals what mental illness looks and feels like from the inside, and how healing from borderline personality disorder is possible through intensive therapy and the support of loved ones. With astonishing honesty, this memoir, *Get Me Out of Here*, reveals what mental illness looks and feels like from the inside, and how healing from borderline personality disorder is possible through intensive therapy and the support of loved ones. A mother, wife, and working professional, Reiland was diagnosed with borderline personality disorder at the age of 29--a diagnosis that finally explained her explosive anger, manipulative behaviors, and self-destructive episodes including bouts of anorexia, substance abuse, and promiscuity. A truly riveting read with a hopeful message. Excerpt: "My hidden secrets were not well-concealed. The psychological profile had been right as had the books on BPD. I was manipulative, desperately clinging and prone to tantrums, explosiveness, and frantic acts of desperation when I did not feel the intimacy connection was strong enough. The tough chick loner act of self-reliance was a complete facade."

2010-05-11 Todd Strasser
Her street name is Maybe She lives with a tribe of homeless teens - runaways and throwaways, kids who have no place to go other than the cold city streets, and no family except for one

another. Abused, abandoned, and forgotten, they struggle against the cold, hunger, and constant danger. With the frigid winds of January comes a new girl: Tears, a twelve-year-old whose mother doesn't believe her stepfather abuses her. As the other kids start to disappear -- victims of violence, addiction, and exposure -- Maybe tries to help Tears get off the streets...if it's not already too late. Todd Strasser, author of the powerful and disturbing *Give a Boy a Gun*, again focuses on an important social issue as he tells a thought-provoking, heart-wrenching story of young lives lost to the streets, and of a society that has forgotten how to care.

1993-01 William White Howells
Renowned anthropologist, author, and educator Howells, draws together the latest from all of today's sciences to tell the fascinating story of man's evolution. Long recognized as one of the world's foremost authorities and interpreters of human evolution, he is also known for his unique contribution of skull measurements to show relationships between peoples.

Clara Atmane
Learn to tell your truth from a reflective, honest, nonreactive prospective. Recently retired from a challenging legal career, Clara Atmane was asking the big questions: Who am I now? Why am I here now? Why am I still so lonely? Digging into the first ten years of her life, Atmane uncovered secrets and hidden treasure. Blame and anger

turned to wonder and curiosity. Emotions and trauma in those first ten years defined her; yet, her ability to survive and the techniques she developed also came to shape who she had become. In *Getting Here From There*, Ms. Atmane proves that where you start has no bearing on where you can end up. Born the youngest of six in a farming family, the idyllic backdrop hid a hostile and unwelcoming environment. The messages in those formative years were clear: You are ugly. Your birth caused our mother's mental illness. If you tell, you will not be believed. There was a dark side to her family. There were villains. Thankfully, there was also survival. *Getting Here From There* will show you how one woman came to forgive and even thank the people who mistreated her.

The first in a wickedly seductive new Scottish historical romance series from New York Times bestselling author Suzanne Enoch! "It's time to fall in love with Suzanne Enoch." — Lisa Kleypas
HAPPILY-EVER-AFTER London socialite Amelia-Rose Baxter is nobody's fool. Her parents may want her to catch a title, but she will never change who she is for the promise of marriage. Her husband will be a man who can appreciate her sharp mind as well as her body. A sophisticated man who loves life in London. A man who considers her his equal—and won't try to tame her wild heart... *IN THE HIGHLANDS* Rough, rugged Highlander Niall MacTaggart and his

brothers know the rules: the eldest must marry or lose the ancestral estate, period. But Niall's eldest brother just isn't interested in the lady his mother selected. Is it because Amelia-Rose is just too. . . Free-spirited? Yes. Brazen? Aye. Surely Niall can find a way to soften up the whip-smart lass and make her the perfect match for his brother for the sake of the family. JUST GOT A WHOLE LOT HOTTER. Instead it's Niall who tempts Amelia-Rose, despite her reservations about barbarian Highlanders. Niall finds the lass nigh irresistible as well, but he won't make the mistake his father did in marrying an Englishwoman who doesn't like the Highlands. Does he have what it takes to win her heart? There is only one way to find out...

2008-11-17 Christina Katz *Sell Your First Book & Develop a Successful and Sustainable Writing Career* Before you can land a book deal—before you can even attract the interest of agents and editors—you need to be visible. How do you become visible? You develop a platform, or a way of reaching your readers. Everybody can develop a platform, and this book shows you how to do it while you're still writing. This book offers: A step-by-step approach to creating, growing, and nurturing a platform An economical approach to self-promotion (no need to spend thousands) A clear way to uncover your strengths and weaknesses as an author The strategies that are essential (or not) to online promotion A

philosophy of authorship that leaves you confident, empowered, and equally partnered with agents, editors, and publishers (instead of waiting to be discovered) A diverse set of tools and methods for getting known (not just web-based tools or ideas for extroverts) After you read this book, you'll be able to answer the inevitable question: "What's your platform?" You'll learn the hows and whys of becoming visible and how to cultivate visibility from scratch. Best of all, you won't need any previous knowledge or experience to get started. Growing a writing career isn't just about landing one book deal and then scrambling like crazy. There is a more strategic and steady way to lay the groundwork so you can avoid scrambling altogether—and *Get Known Before the Book Deal* is the only comprehensive book that shows you how.

2014-06-16 Jack Gibson "Jack [Gibson] shares snippets of his life in short stories that will make you laugh and maybe even shed a tear and most importantly provide insight into a man who has achieved much and helped many. Sunday morning visits with cancer patients, travels to Scotland that bond him to his heritage and roadways that run throughout Maine and our country each with a tale of its own...this book will make you take stock of your own life and the profound impact we can all make on our communities." Richard W. Petersen, Pres. & CEO Maine Medical Center From the seven-year-old

budding entrepreneur selling magazines door-to-door to the octogenarian (who would believe it?), Gibson has found ways to give back to his community and his beloved State of Maine. Jack Gibson walks a life of intention. Through his career with his paving and recycling companies, Jack was a problem solver. He discovered and licensed methods to make waste products "disappear" into usable products. In essence, Gibson created inert products from contaminated soil, used pavement, rubber by-products and a whole spectrum of construction debris. In his personal life, from honoring his mother and father, to parenting sons, to mourning a life lost to relearning to love, Gibson provides a lesson to all of us that our lives here on earth are important. Whether at work or in the home, what we do matters. Jack Gibson, in his humble delivery of his story, let's us know that we matter.

2021-05-11 Faith Kearns *Scientists today working on controversial issues from climate change to drought to COVID-19 are finding themselves more often in the middle of deeply traumatizing or polarized conflicts they feel unprepared to referee. It is no longer enough for scientists to communicate a scientific topic clearly. They must now be experts not only in their fields of study, but also in navigating the thoughts, feelings, and opinions of members of the public they engage with, and with each other. And the conversations are growing*

more fraught. In *Getting to the Heart of Science Communication*, Faith Kearns has penned a succinct guide for navigating the human relationships critical to the success of practice-based science. This meticulously researched volume takes science communication to the next level, helping scientists to see the value of listening as well as talking, understanding power dynamics in relationships, and addressing the roles of trauma, loss, grief, and healing.

2015 Andrew Kenneth Johnston
If you want to know where you are, you need a good clock. The surprising connection between time and place is explored in *Time and Navigation: The Untold Story of Getting from Here to There*, the companion book to the National Air and Space Museum exhibition of the same name. Today we use smartphones and GPS, but navigating has not always been so easy. The oldest "clock" is Earth itself, and the oldest means of keeping time came from observing changes in the sky. Early mariners like the Vikings accomplished amazing feats of navigation without using clocks at all. Pioneering seafarers in the Age of Exploration used dead reckoning and celestial navigation; later innovations such as sextants and marine chronometers honed these techniques by measuring latitude and longitude. When explorers turned their sights to the skies, they built on what had been learned at sea. For example, Charles Lindbergh

used a bubble sextant on his record-breaking flights. World War II led to the development of new flight technologies, notably radio navigation, since celestial navigation was not suited for all-weather military operations. These forms of navigation were extended and enhanced when explorers began guiding spacecraft into space and across the solar system. Astronauts combined celestial navigation technology with radio transmissions. The development of the atomic clock revolutionized space flight because it could measure billionths of a second, thereby allowing mission teams to navigate more accurately. Scientists and engineers applied these technologies to navigation on earth to develop space-based time and navigation services such as GPS that is used every day by people from all walks of life. While the history of navigation is one of constant change and innovation, it is also one of remarkable continuity. *Time and Navigation* tells the story of navigation to help us understand where we have been and how we got there so that we can understand where we are going.

Later Nature sets the scene for stories that spread from tracking Sasquatch in the Siskiyou to a murderous winter gale on a Yellowstone peak. They take in rock hunting in the Utah desert and fishing

in a tributary of a river that springs, full-blown, from the side of a mountain. Wildlife populates the stories, like the moose that becomes the author's fishing partner and the two swans that conspire to protect a beleaguered neighbor. Celebrities make appearances as well, including famed artist Archie Teater, philanthropist Roland Harriman, Minnesota Viking lineman Jim Marshall, and a handful of Idaho governors. Full of laugh-aloud humor as well as heart-stopping drama, *Getting Here* comes with the insight and wit of a man who has spent a lifetime championing the great outdoors.

1998 Fred Weiner *Nature* mirrors our own wisdom back to us, when we see it through a true poet's eyes. So it is with these exquisite haiku and poems of immediate experience, being fully present, fully experiencing what life offers or takes away. Weiner's poetry shows how a healthy contemplation of anguish can help us see our deep wounds in a way that brings true healing of them.

2015-04-14 Gillian Zoe Segal "The highest achievers share some of their lowest moments, and there is much wisdom to be gained from those struggles. Captivating, thought-provoking." —David Faber, CNBC The path to success is rarely easy or direct, and good mentors are hard to find. In *Getting There*, thirty leaders in diverse fields share their secrets to navigating the rocky

road to the top. In an honest, direct, and engaging way, these role models describe the obstacles they faced, the setbacks they endured, and the vital lessons they learned. They dispense not only essential and practical career advice, but also priceless wisdom applicable to life in general. *Getting There* is for everyone—from students contemplating their futures to the vast majority of us facing challenges or seeking to reach our potential. "Kudos to Gillian Zoe Segal for assembling this remarkable group of visionaries and helping them all tell their stories without filters or false bravado. *Getting There* is both empowering and illuminating." —Piper Kerman, New York Times bestselling author of *Orange Is the New Black* "Life-changing, real-world advice." —Vanity Fair "Reading *Getting There* is like having an intimate, one-on-one talk with some of the world's most fascinating and accomplished people. You will be taken aback by their honesty, entertained by their anecdotes, and, most of all, learn invaluable lessons about both business and life. This book is fantastic—you will not be able to put it down!" —JJ Ramberg, bestselling author of *It's Your Business* "Somehow, Gillian Zoe Segal has gotten these leaders to share their stories in a unique, authentic, and revealing way." —Robert Steven Kaplan, former president and CEO of the Federal Reserve Bank of Dallas

2021-10-05 Jayson Gaddis The relationship teacher, coach,

and founder of The Relationship School reveals the origins of conflict styles, how to stop avoiding difficult conversations, and how to resolve conflict in our most important relationships. Conflicts in our closest relationships are scary because so much is at stake. If the conflict doesn't go well, we could lose our marriage, our family or our job, all connected to our security and survival. So we do just about anything not to lose those relationships, including avoid conflict, betraying ourselves or becoming dishonest. Unresolved conflict affects every single aspect of our lives, from self-confidence to physical and mental health. Jayson Gaddis is a personal trainer for relationships and one of the world's leading authorities on interpersonal conflict. For almost two decades, Gaddis has helped individuals, couples, and teams get to the bottom of their deepest conflicts. He helps people see the wisdom in conflict and how to get to zero—which means we have successfully worked through our conflict and have nothing in the way of a good connection. In *Getting to Zero*, Gaddis shows the reader how to stop running away from uncomfortable conversations and instead learn how to work through them. Through funny personal stories, uncomfortable examples, and effective tools and skills, he shows the reader how to move from disconnection to connection, acceptance, and understanding. This method upgrades the old tired and

static conflict resolution approaches and offers a fresh, street-level, user-friendly road map on exactly how to work through conflict with the people you care most about.

2020-10-27 Marlee Grace
"Marlee's work shifts and stretches. This new collection is a necessary resource for those of us looking to re-center, lean in, and get curious about ourselves, about our heart's work. Getting to Center is a blessing in book form."
—Alexandra Elle, author of After the Rain From the beloved creator, workshop facilitator, and author of How to Not Always Be Working comes an approachable and practical guide to leaning into the unknown even when it feels as though everything around—and inside—us is in flux. Picking up where How to Not Always Be Working left off, Getting to Center is an empathetic offering to those who are looking for a roadmap for finding their way back to equilibrium. This book meditates on endings, grief and joy, ease, hope, addiction, and beginnings, pairing Marlee's

own experiences and wisdom with practical exercises and tools for creating balance and understanding within the natural changes of life. In her own constant shifting, improviser and entrepreneur Marlee Grace has found ways to pivot within her career, while still maintaining constant threads throughout. She has developed practices that have supported her through opening and closing multiple businesses, a divorce, several cross-country moves, choosing sobriety, and more. Essential for anyone who feels overwhelmed and anxious about these unpredictable times, this gorgeous, thoughtful book is a hand to hold to feel less alone, and a guide to cultivating resources we can replenish and depend on in ourselves.

2010-09-03 Marshall Goldsmith
Your hard work is paying off. You are doing well in your field. But there is something standing between you and the next level of achievement. That something may just be one of your own annoying habits. Perhaps one small flaw - a behaviour you barely even recognise - is the only thing that's keeping you from where you want to be. It may be that the very characteristic that you believe got you where you are - like the drive to win at all costs - is what's holding you back. As this book explains, people often do well in spite of certain habits rather than because of them - and need a "to stop" list rather than one listing what "to do". Marshall Goldsmith's expertise is in helping global

leaders overcome their unconscious annoying habits and become more successful. His one-on-one coaching comes with a six-figure price tag - but in this book you get his great advice for much less. Recently named as one of the world's five most-respected executive coaches by Forbes, he has worked with over 100 major CEOs and their management teams at the world's top businesses. His clients include corporations such as Goldman Sachs, Glaxo SmithKline, Johnson and Johnson and GE.

An empowering guide for students in STEMM that demystifies the process of securing undergraduate research experiences. Conducting research is an important foundation for many undergraduates on STEMM career paths. But landing an extremely competitive research spot that is also an enriching experience involves knowing how to present yourself effectively and an awareness of your goals and expectations. In this book, an expert lab manager and a longtime principal investigator share their secrets for obtaining these coveted positions. Offering advice to students in a wide variety of STEMM fields at both research-intensive universities and primarily undergraduate institutions, Getting In helps students navigate the hidden curriculum of academia, unofficial rules that disproportionately affect first-generation college students and those from low-income backgrounds and

communities historically underrepresented in science. The authors provide not only an overview of STEM research and lab opportunities but also specific strategies for the entire application process—including how to write emails that get noticed by busy professors, how to ask for a research position during office hours, and interview questions to prepare for—so students can claim their place in research settings. With its emphasis on the many interpersonal and professional benefits of research experiences, *Getting In* equips all STEM undergrads with the tools they need both to secure these valued positions and to develop habits that will build productive relationships with their future research mentors. As an undergrad, *Getting In* will help you: determine how much time you can spend on research by evaluating your current activity level and goals. find the time to do research without giving up your social life or risking your GPA. avoid common mistakes in the search, application, or interview that make it harder to find a research experience. write emails that get you noticed by busy professors by customizing the included templates. prepare for tough interview questions so you'll impress the interviewer with your answers, and be able to determine if the position is right for you. As a research mentor, *Getting In* will help your students: navigate the hidden curriculum of finding a research experience in science, technology, engineering, math,

and medicine (STEMM). set realistic expectations for their research experience. understand why conducting research requires effort and will include some failure and other challenges. be active participants in their success in the lab.

Globalisation, technology and an increasingly competitive business environment have encouraged huge changes in what is known as supply chain management, the art of sourcing components and delivering finished goods to the customer as cost effectively and efficiently as possible. Dell transformed the way people bought and were able to customise computers. Wal-Mart and Tesco have used their huge buying power and logistical skills to ensure the supply and stock management of their stores is finely honed. Manufacturers now make sure that components are where they are needed on the production line just in time for when they are needed and no longer. Such finessing of the way the supply chain works boosts the corporate bottom line and can make the difference between being a market leader or an also ran. This guide explores all the different aspects of supply chain management and gives hundreds of real life examples of what firms have achieved in the field.

2009-10-14 Peter Ney
The night before his seventh

birthday, Peter Ney and his family were awakened by the sound of yelling and of breaking glass as their home was vandalized. Kristallnacht was just the beginning of the Nazi violence against the Jews, and it shaped the rest of Peter's life. Spanning seventy years, *Getting Here* narrates the many twists and turns of his life. Two months after Kristallnacht, Peter's parents placed him on a train to England; he was one of 10,000 German children granted safe refuge in England via the Kindertransport. His parents joined him in London just before the start of World War II, and as a family they immigrated to the United States. This memoir tells of Peter's journey from Germany—from his adolescence and art school training, to his fifty-six year marriage to Betty; work as a designer of consumer products, and human engineer in the space program, a twenty-year career as a trial attorney, and his tenure as a judge on the Colorado Court of Appeals. More than seventy years ago, Peter and his family arrived penniless in the United States. *Getting Here* not only describes that journey, but rejoices in the fulfilling of the American dream—from a seat on a refugee train to a seat on the appellate bench.

Cutting through the noise. Sometimes we need a little direction in life, whether to see a problem from a new perspective or confirm a gut feeling. Or maybe we just need

a little encouragement- an affirmation that will send us sailing into the day with confidence (Admit to yourself that your ass is exquisite). Filled with clarity, inspiration, and just the right dose of humor, *Directions* provides all that and more. And like, a Magic 8 Ball, it's always ready for a consultation when you need it: What direction do I need today?

1999-05-01 Richard Michael Fischl Professors Fischl and Paul explain law school exams in ways no one has before, all with an eye toward improving the reader's performance. The book begins by describing the difference between educational cultures that praise students for "right answers," and the law school culture that rewards nuanced analysis of ambiguous situations in which more than one approach may be correct. Enormous care is devoted to explaining precisely how and why legal analysis frequently produces such perplexing situations. But the authors don't stop with mere description. Instead, *Getting to Maybe* teaches how to excel on law school exams by showing the reader how legal analysis can be brought to bear on examination problems. The book contains hints on studying and preparation that go well beyond conventional advice. The authors also illustrate how to argue both sides of a legal issue without appearing wishy-washy or indecisive. Above all, the book explains why exam questions may generate feelings of uncertainty or doubt about correct legal outcomes

and how the student can turn these feelings to his or her advantage. In sum, although the authors believe that no exam guide can substitute for a firm grasp of substantive material, readers who devote the necessary time to learning the law will find this book an invaluable guide to translating learning into better exam performance. "This book should revolutionize the ordeal of studying for law school exams... Its clear, insightful, fun to read, and right on the money." — Duncan Kennedy, Carter Professor of General Jurisprudence, Harvard Law School "Finally a study aid that takes legal theory seriously... Students who master these lessons will surely write better exams. More importantly, they will also learn to be better lawyers." — Steven L. Winter, Brooklyn Law School "If you can't spot a 'fork in the law' or a 'fork in the facts' in an exam hypothetical, get this book. If you don't know how to play 'Czar of the Universe' on law school exams (or why), get this book. And if you do want to learn how to think like a lawyer—a good one—get this book. It's, quite simply, stone cold brilliant." — Pierre Schlag, University of Colorado School of Law (Law Preview Book Review on The Princeton Review website) Attend a *Getting to Maybe* seminar! 2018-03-06 Seth Davis What makes a coach great? How do great coaches turn a collection of individuals into a coherent "us"? Seth Davis, one of the

keenest minds in sports journalism, has been thinking about that question for twenty-five years. It's one of the things that drove him to write the definitive biography of college basketball's greatest coach, John Wooden, *Wooden: A Coach's Life*. But John Wooden coached a long time ago. The world has changed, and coaching has too, tremendously. Seth Davis decided to embark on a proper investigation to get to the root of the matter. In *Getting to Us*, Davis probes and prods the best of the best from the landscape of active coaches of football and basketball, college and pro—from Urban Meyer, Dabo Swinney, and Jim Harbaugh to Mike Krzyzewski, Tom Izzo, Jim Boeheim, Brad Stevens, Geno Auriemma, and Doc Rivers—to get at the fundamental ingredients of greatness in the coaching sphere. There's no single right way, of course—part of the great value of this book is Davis's distillation of what he has learned about different types of greatness in coaching, and what sort of leadership thrives in one kind of environment but not in others. Some coaches have thrived at the college level but not in the pros. Why? What's the difference? Some coaches are stern taskmasters, others are warm and cuddly; some are brilliant strategists but less emotionally involved with their players, and with others it's vice versa. In *Getting to Us*, we come to feel a deep connection with the most successful and iconic coaches in all of sports—big winners and big

characters, whose stories offer much of enduring interest and value.

1991 Roger Fisher Describes a method of negotiation that isolates problems, focuses on interests, creates new options, and uses objective criteria to help two parties reach an agreement.

2012-01-26 Margaret R Miles
This book of conversations between Margaret R. Miles and Hiroko Sakomura compares the experiences of two women who grew up in different societies, with different educations, different professions, and different religious orientations. Reflecting on the different ways in which Japanese and American societies inhibited and enabled them, these two women share their struggles, difficulties, and achievements. All of this is set in the context of one of the most radical social movements in the history of the world, as women are gaining increments of equality with men in designing and administering the institutions of public life with opportunities, dangers, and rewards. This is a moment in which a critical mass of women "want it all now", in the best sense of the phrase, seeking to preserve and reinterpret traditional values while exercising their capabilities and skills both in the home and in public life. This book is the memoir of two women's painful and joyful experiences in "getting here from there".

Come Matter Here is a call to

stop putting your life on hold until "someday" and start digging your heels into the here and now to build the life God has designed for you. Life is scary. Adulting is hard. When faced with the challenges of building a life of your own, it's all too easy to stake your hope and happiness in "someday." But what if the dotted lines on the map at your feet today mattered just as much as the destination you dream of? Hannah Brencher, TED Talk speaker and founder of The World Needs More Love Letters, thought Atlanta was her destination. Yet even after she arrived, she found herself in the same old chase for the next best thing...somewhere else. And it left her in a state of anxiety and deep depression. Our hyper-connected era has led us to believe life should be a highlight reel—where what matters most is perfect beauty, instant success, and ready applause. Yet, as Hannah learned, nothing about faith, relationships, or character is instant. So she took up a new mantra: be where your feet are. Give yourself a permission slip to stop chasing the next big thing, and come matter here. Engage the process as much as you trust the God who lovingly leads you. If you are tired of running away from your life or tired of running ragged toward the next thing you think will make you feel complete, Come Matter Here will help you do whatever it takes to show up for the life God has for you. Whether you need to make a brave U-turn, take a bold step forward, or finish the next lap

with fresh courage, find fuel and inspiration for the journey right here.

No matter how far or close you think you are to retirement, this book is your one-stop guide to help you plot your direction for the coming decades. Not long ago everyone knew what the word retirement meant--retire at age 65 after 40 years at the same job and coast through your golden years courtesy of a comfortable nest egg. But now, age expectancy is higher, savings are slimmer, and people change jobs more frequently. Clinging to this outdated concept of retirement only gets you a room in your kids' house. Your retirement is going to require an incremental approach to planning--and you must begin now. This requires conscious engagement, diverse interests, and the ability to adapt. In *How Do I Get There from Here?*, readers will first be directed how to review all their assets--both tangible and intangible--so they can get an honest assessment of where they are right now. Then a journey through self-reflective questions and exercises will: walk you through imagining your future, identifying skills you'll need, and learning how to prepare for inevitable twists and turns along the way. Stop clinging to an ancient and stereotypical idea of retirement. Decades of nonstop leisure is not only unreachable for most, it's not even truly desirable. Begin now charting the path for a unique, dynamic future you can look forward to!
