2009 Lyndel Meikle In the language of the Shoshone, Sacagawea's people, the Deer Lodge Valley was it-soo-ke-en-carne. The name referred to a lodge-shaped mound--a natural salt lick where deer gathered. By the early 1800s, French-Canadian trappers and traders were exploring the valley's river (now known as the Clark Fork River) and its tributaries. The Shoshone name was translated into French as la loge du chevreuil. Soon, as Montana's gold rush began, traders from Fort Hall in southern Idaho settled here. The town became Spanish Fork, Cottonwood, La Barge City, and finally the Shoshone name returned, now in English, as Deer Lodge.

1892

2001 Mike McConnell Bear Tales and Deer Trails is a collection of hunting stories that take you into the heart of the Tongass National Forest. Come along with Mike and his hunting partners as they stalk bears and deer for food as part of their subsistence lifestyle. Each chapter begins a new adventure in the bays, muskegs and mountains

of Southeast Alaska. The stories are full of interesting characters, vivid descriptions of the landscape and a look into a disappearing way of life. You will find information about guns, hunting techniques and lore about the animals themselves. The stories are true and drawn from the author’s personal experiences. This is the Tongass when wild was still part of wilderness!

1996 Carolyn Hull Sieg The white-tailed deer is one of the most studied animals in North America, yet much of the available information has been derived in ecosystems different from the Black Hills. The Black Hills are unique in that the dominant species, ponderosa pine, has excellent regenerative abilities. This attribute, combined with timber management practices and fire suppression efforts in the last century, has allowed pine to expand at the expense of other plant communities. A critical first step in maintaining viable white-tailed deer populations in the Black Hills is identifying key winter ranges. Given that protein and energy are limiting in winter forages in this region, the emphasis of management on these ranges should be to enhance forage quality and quantity. Prescribed burning and timber harvest can be used to enhance the forage base. Grazing systems designed to remove livestock from these key winter ranges before late summer will provide a greater portion of the woody plants for deer use. Research needs focus on understanding how changes in Black Hills community patterns have influenced deer foraging strategies and habitat use, and on the need for ecologically based techniques to maintain consistent forage quality. Addressing these needs in an ecosystem framework will result in habitat for not only deer, but also for a multitude of other animal and plant species.

2003-12 Bryant C. Blewett Yellow Bear Lodge is a romantic novel set in Montana and laced together with soft sex, violence, humor, and tall tales. The setting is a dude ranch in the Montana Absaroka-Beartooth Wilderness forty-two miles from the closest town. The scenery is spectacular and the abundance of beauty and wildlife frames the adventures of the diverse ranch crew and the local populace they encounter. An ancient Indian folktale about a menacing yellow grizzly bear in this valley is entwined with the rampaging descendent of that magnificent creature that delivers Montana justice in an engaging climax. *** A native of Helena, Montana, BRYANT BLEWETT holds a Montana State University degree in Business, and a Master of Taxation from Golden Gate University in San Francisco. He graduated from Stanford's Graduate School of Business, Executive Program, in 1986 and earned his CPA in 1972. He spent twenty-two years with The Clorox Company as the head of their Tax Department. A fourth generation northern Californian, ELLEN MARSHALL earned her Bachelor of Arts degree in Dance and Dramatic Art from the University of California, Berkeley in 1974. After a seventeen year career in retail banking with First Interstate Bank of California, she branched out into residential real estate. She and Bryant are married and live in Alameda, California during the winter months. Summer and fall finds them high up in the mountains at their dude ranch, Hawley Mountain Guest Ranch, south of McLeod, Montana which they help manage with partners, Ron and Phyllis Jarrett.
